

PROFESSIONAL CONCENTRATE

A gentle, safe and effective wash for dogs.

ADVANTAGES

UNIQUE - Dog Wash is not just another dog wash converted from an anionic human shampoo type formula. Dog wash is an innovative, non-ionic rich, formula. It is purpose built and specifically designed for the requirements of dogs.

GENTLE - The large molecule, non-ionic wash actives maximise the gentleness of the shampoo gently lifting dirt and excess oiliness away without drying or irritation to the animal skin. Dog wash is safe for us on all animal coats.

EFFECTIVE - Dog Wash is specifically formulated to provide optimum cleaning and conditioning performance.

CONDITIONING - Dog Wash contains super-fattening agents that remain after rinsing to replenish the natural condition of the coat. The wash of choice when the look and feel of the animal is of prime importance.

ECONOMICAL - Dog Wash is a high quality and highly concentrated shampoo that gives superb results when diluted as directed.

FLEA CONTROL - Flea Free Dog Wash contains active Permethrin to assist in the control of fleas.

DIRECTIONS FOR USE:

FLEE FREE may be used as a dog shampoo or diluted at 10-40ml per litre of warm bath water.

Rinse thoroughly with tepid water.
